

# Introduction and Welcome

## n Role of Controls

- ◆ a service?
- ◆ core system?
- ◆ Importance for machine commissioning and performance

## n LHC-CP Mandate

- ◆ LHC: probably much more complicated than previous machines
- ◆ LHC Injectors (SPS and PS) control system will help reproducibility of crucial parameters e.g. emittance preservation

## n Restructuring?

- ◆ Common controls group? LHC CP inside this group
- ◆ Restructuring should not slow up progress of LHC CP
